PROFESSIONAL SUMMARY

Senior Fullstack Developer with experience building modern, production-ready web applications using React, Next.js, Node.js, MongoDB, and PostgreSQL technologies. Skilled in developing responsive frontend systems, secure backend APIs, and scalable user-focused products with strong emphasis on performance, maintainability, accessibility, and clean user experience.

Passionate about solving real-world problems through thoughtful product development, modern UI systems, and practical fullstack architecture.

CORE SKILLS

Frontend	Backend	Database	CMS & Tools:
Framer Motion	Node.js	MongoDB	WordPress
CSS3	Express.js	PostgreSQL	Git/GitHub
HTML5	REST APIs	Supabase	Vercel
Tailwind CSS	Authentication	Firebase	Render
TypeScript	Server Actions		
JavaScript			
Next.js			

React.js			
----------	--	--	--

Development Focus:

- Responsive Design
- Performance Optimization
- Accessibility
- Secure Web Development

FEATURED PROJECTS

1. Cortex Systems Portfolio

Premium interactive fullstack portfolio platform showcasing modern product-focused development.

- Built AI-powered command center with fuzzy search and architectural summaries
- Implemented accessibility-first UI, SEO optimization, telemetry dashboard, and secure contact workflows
- Developed responsive dashboard-style interface using Next.js, Tailwind CSS, and Framer Motion

Tech Stack:

Next.js, TypeScript, Node.js, Tailwind CSS

2. School Management System

Fullstack platform designed to streamline school administration and student management workflows.

- Developed responsive dashboards for enrollment, grading, and administrative operations
- Built secure backend APIs and scalable frontend architecture
- Optimized application structure for maintainability and real-world usage

Tech Stack:

Next.js, Node.js, PostgreSQL

3. ImpactConnect Platform

Community-focused NGO platform built to improve engagement and communication.

- Designed responsive frontend interfaces and dynamic content workflows
- Developed backend integrations and structured navigation systems
- Focused on usability, accessibility, and mobile responsiveness

Tech Stack:

React.js, Node.js, MongoDB

PROFESSIONAL EXPERIENCE

Fullstack Developer — I4 Technologies

- Developed modern business and web applications for clients across different industries
- Built responsive frontend interfaces and backend integrations
- Improved usability, maintainability, and performance of deployed applications

EDUCATION

M.Sc. Information Technology

B.Tech. Computer Science

TECHNICAL INTERESTS

- Fullstack Product Development
- Modern React Ecosystem
- Performance Optimization
- Secure Web Applications
- AI-Assisted User Experiences
